

ARMCHAIR

ALVASTRA 160

Alvastra 160 is a chair in solid birch, with braided saddle girth in the seat and back. It is stackable for easy storage. The saddle girth comes in black as standard, but individual coloring is possible for an additional charge. The chair is available both with and without frames.

The wooden frame is available in clear lacquered birch or stained in black or white as standard.

Alvastra is labeled with FSC and Möbelfakta.

Alvastra är ritad av Marit Stigsdotter.

DIMENSIONS

Height	87 cm
Width	60 cm
Depth	60 cm
Seat height	44 cm
Seat depth	46 cm
Höjd armledare	63 cm

Any NCS-color available as an option on this product.

ADDED VALUE

- Stackable
- Linkable
- Detail in the arm guide reduces the risk of crushing
- Arched back for high comfort
- Wide range of saddle girth colors
- Low weight thanks to saddle girth seat/back
- Any color
- Tested for public use and meets the requirements for durability & safety, set forth in the following standard, EN 16139

ACCESSORIES

- Frame in birch
- Frame in any color
- Coupling fittings

FABRIC

- Removable and washable fabrics are washed according to washing instructions. These are sewn with a shrink seam, wash before use for optimal fit.
- Vacuuming with a soft nozzle is often sufficient for cleaning.
- Stains should always be removed as quickly as possible. In most cases, wiping with a damp cloth is sufficient, for more difficult stains, a pH-neutral detergent or a foam detergent for professional use can be used.
- Always use white cloths and avoid wetting a woolen fabric to a greater extent, as this risks remaining stains.
- If necessary, a foam detergent can also be used for a more thorough cleaning if this is allowed in the fabric's specification.

WOOD

Wood is a living material whose grain from the very beginning has a natural variation in pattern, color tone and luster. The wood is affected by, among other things, the season, heat and humidity. That wood is a living material means:

- Screws need to be re-tightened regularly, at least once a year.
- Solid table tops can naturally warp by up to 0.5%.
- Light from the sun and lighting can cause permanent color and light differences in the surface, so allow the entire wooden surface to be exposed to the same amount of light.

Out of concern for the environment, we paint a large part of our range with water-based surface treatments. This means:

- Spills of coffee and other liquids need to be wiped up immediately.
- For cleaning, hand washing detergent or pH-neutral detergents and lukewarm water are recommended. Wipe off with clean water and wipe dry. Do not use cleaning agents that are alkaline, aggressive, contain abrasives or solvents.
- For disinfection, non-alcohol-based agents are recommended, e.g. Virkon or DAX Alco Free. Alcohol-based agents must not be used.
