

ARMCHAIR

RARE 077

Rare armchair is the result of our vision to create products from natural materials, with the least possible waste and material consumption.

Rare armchair, here our basic idea was to try to make use of the whole tree and show respect for the wood raw material in a new empathetic way. We have chosen to use parts of the tree that are otherwise hidden behind textiles or burned, to really make the most of it. In this way, each chair becomes unique and more alive, a small color change or twig shows in a nice way our concern to take care of all materials and not discard anything unnecessarily. The construction of the chair with its straight shapes and finger joints on the legs allows us to minimize material consumption and contributes to less waste, nothing that impairs the strength.

Rare är tillverkat i FSC-certifierad björk. Rare är ritad av NC Design Studio.

DIMENSIONS

Height	85 cm
Width	54 cm
Depth	53 cm
Seat height	45 cm
Seat depth	44 cm
Höjd armledare	65 cm

Any color available as an option on this product.

ADDED VALUE

- We use almost all of the raw wood
- Reduced material consumption
- Light with good strength
- Hangable
- Demountable-replaceable spare parts
- Removable upholstery
- Any color
- Tested for public use and meets the requirements for durability & safety, set forth in the following standard, EN 16139

ACCESSORIES

- Frame in birch

NC Nordic Care AB

Box 30 573 35 Tranås Sweden

FABRIC

- Removable and washable fabrics are washed according to washing instructions. These are sewn with a shrink seam, wash before use for optimal fit.
- Vacuuming with a soft nozzle is often sufficient for cleaning.
- Stains should always be removed as quickly as possible. In most cases, wiping with a damp cloth is sufficient, for more difficult stains, a pH-neutral detergent or a foam detergent for professional use can be used.
- Always use white cloths and avoid wetting a woolen fabric to a greater extent, as this risks remaining stains.
- If necessary, a foam detergent can also be used for a more thorough cleaning if this is allowed in the fabric's specification.

WOOD

Wood is a living material whose grain from the very beginning has a natural variation in pattern, color tone and luster. The wood is affected by, among other things, the season, heat and humidity. That wood is a living material means:

- Screws need to be re-tightened regularly, at least once a year.
- Solid table tops can naturally warp by up to 0.5%.
- Light from the sun and lighting can cause permanent color and light differences in the surface, so allow the entire wooden surface to be exposed to the same amount of light.

Out of concern for the environment, we paint a large part of our range with water-based surface treatments. This means:

- Spills of coffee and other liquids need to be wiped up immediately.
- For cleaning, hand washing detergent or pH-neutral detergents and lukewarm water are recommended. Wipe off with clean water and wipe dry. Do not use cleaning agents that are alkaline, aggressive, contain abrasives or solvents.
- For disinfection, non-alcohol-based agents are recommended, e.g. Virkon or DAX Alco Free. Alcohol-based agents must not be used.
