

CHAIR

ALVA 074

Alva 074 is a stylish chair in Scandinavian design. The chair was designed by Jonas Osslund, who aimed to design a classic stick chair with as few sticks as possible. The result was a chair with solid craftsmanship and good design. The slightly folded back sticks are shaped according to the user, for maximum comfort.

Alva is NC Nordic Care's first product in ash, with a tree structure that gives a living impression.

The chair is offered with a wooden seat or a fixed, upholstered seat. Alva is available in clear lacquered ash, or stained in white or black as standard.

DIMENSIONS

Height	84 cm
Width	45 cm
Depth	54 cm
Seat height	47 cm
Seat depth	40 cm

ADDED VALUE

- Nice and solid peg chair in ash
- Modern peg chair with a classic look
- The pegs in the back form a natural bag hook

- Tested for public use and meets the requirements for durability & safety, set forth in the following standard, EN 16139

ACCESSORIES

- Frame in ash
- Available in wooden and fixed upholstered seat
- Frame in any NCS color

REUSE

- Solid wood

 Any NCS-color available as an option on this product.

VIEWS

WOOD

Wood is a living material whose grain from the very beginning has a natural variation in pattern, color tone and luster. The wood is affected by, among other things, the season, heat and humidity. That wood is a living material means:

- Screws need to be re-tightened regularly, at least once a year.
- Solid table tops can naturally warp by up to 0.5%.
- Light from the sun and lighting can cause permanent color and light differences in the surface, so allow the entire wooden surface to be exposed to the same amount of light.

Out of concern for the environment, we paint a large part of our range with water-based surface treatments. This means:

- Spills of coffee and other liquids need to be wiped up immediately.
- For cleaning, hand washing detergent or pH-neutral detergents and lukewarm water are recommended. Wipe off with clean water and wipe dry. Do not use cleaning agents that are alkaline, aggressive, contain abrasives or solvents.
- For disinfection, non-alcohol-based agents are recommended, e.g. Virkon or DAX Alco Free. Alcohol-based agents must not be used.
