

CHAIR

ALVA 174

The armchair Alva 174 is a development of the Alva chair that was launched in 2017. The new Alva is also made of ash, but now with armrests in metal wire that are wrapped around the back pins, with a bracket under the seat. The slightly folded back pins are shaped according to the user for maximum comfort.

The chair was designed by Jonas Osslund, who aimed to design a classic stick chair with as few sticks as possible. The end result was a chair with solid craftsmanship and good design.

Alva 174 is offered with a wooden seat or a fixed, upholstered seat. Alva is available in clear lacquered ash, or stained in white or black as standard.

For an additional charge, it can be ordered in any NCS color. Fabric is freely chosen. Take a look at our fabric guide for tips.

DIMENSIONS

Height	84 cm
Width	48 cm
Depth	54 cm
Seat height	45 cm

Any NCS-color available as an option on this product.

VIEWS

ADDED VALUE

- Nice and solid peg chair in ash
- Modern peg chair with a classic look
- The pegs in the back form a natural bag hook

ACCESSORIES

- Frame in ash
- Available in wooden and fixed upholstered seat
- Leather wrapping on armrests
- Frame in any NCS color

REUSE

- Solid wood

METAL

- For regular cleaning, use a lightly moistened cloth with a mild detergent without solvents or abrasives.
- For heavily soiled surfaces, a cloth moistened with alcohol can be used.
- Disinfection can be done with alcohol if the surface is dried afterwards.

WOOD

Wood is a living material whose grain from the very beginning has a natural variation in pattern, color tone and luster. The wood is affected by, among other things, the season, heat and humidity. That wood is a living material means:

- Screws need to be re-tightened regularly, at least once a year.
- Solid table tops can naturally warp by up to 0.5%.
- Light from the sun and lighting can cause permanent color and light differences in the surface, so allow the entire wooden surface to be exposed to the same amount of light.

Out of concern for the environment, we paint a large part of our range with water-based surface treatments. This means:

- Spills of coffee and other liquids need to be wiped up immediately.
- For cleaning, hand washing detergent or pH-neutral detergents and lukewarm water are recommended. Wipe off with clean water and wipe dry. Do not use cleaning agents that are alkaline, aggressive, contain abrasives or solvents.
- For disinfection, non-alcohol-based agents are recommended, e.g. Virkon or DAX Alco Free. Alcohol-based agents must not be used.
